ABOUT ME

Full Stack Developer with a Diploma in Informatics Management, focused on web application development. Experienced in developing information systems and exploring modern application architecture through the SnapVid project. Familiar with Laravel, PHP, JavaScript, Next.js, FastAPI, REST APIs, relational databases, Git/GitHub, and AI development tools.

EDUCATION

Politeknik Piksi Input Serang — Diploma in Informatics Management | October 2023 – October 2026

WORK EXPERIENCE & ORGANIZATIONS

Kantor Notaris & PPAT Munir Syawal — Administrative Assistant | Nov 2025 – Feb 2026

- Managed document input, filing, and administrative tasks.
- Assisted with data management while ensuring accuracy and completeness.
- Coordinated with relevant parties to support administrative processes.

Freelance / Personal Projects — Web Developer | Jan 2026 – Present

- Developed web applications using PHP, Laravel, JavaScript, and relational databases.
- Implemented CRUD, authentication, REST APIs, and database integration.
- Performed debugging and version control using Git/GitHub.
- Utilized AI development tools for coding and exploring technical solutions.

HMMI — Politeknik Piksi Input Serang — Technology & Digital Division | Dec 2023 – Jul 2026

- Participated in managing the organization's technology and digital needs.
- Assisted with activity coordination and digital needs within the division.
- Collaborated with organization members to complete tasks and activities.

PROJECTS

SnapVid — All-in-One Media Toolkit | Next.js • Tailwind CSS • FastAPI • FFmpeg • PostgreSQL • Docker

- Designed a web-based media toolkit concept for downloading, converting, and processing various types of media.
- Designed frontend and backend separation using Next.js and FastAPI.
- Explored FFmpeg, ImageMagick, and Whisper for media processing and transcription.
- Designed deployment using Vercel for the frontend and a VPS for backend/media processing.

Final Project Submission & Monitoring Information System | Laravel • PHP • MySQL • Bootstrap

- Developed an information system to support student final-project submission and monitoring.
- Implemented Laravel MVC, routing, controllers, models, migrations, CRUD, and authentication.
- Designed a MySQL database structure for managing student and final-project data.

Diagnoskin — Skin Disease Detection | Python • OpenCV • MediaPipe

- Contributed to a team project developing a computer vision application for skin disease identification.

SKILLS

- Programming: PHP, JavaScript, Python
- Frontend: HTML5, CSS3, Bootstrap, Next.js
- Backend: Laravel, FastAPI, REST APIs, MVC, CRUD
- Database: MySQL, PostgreSQL, SQLite
- Tools & Technologies: Git, GitHub, Docker, Composer, npm, VS Code, PWA, Authentication
- Media & AI: FFmpeg, ImageMagick, Whisper, Gemini API, OpenCV, MediaPipe
- Soft Skills: Problem Solving, Analytical Thinking, Teamwork & Collaboration, Communication

CERTIFICATIONS

- Coding Camp 2025 — Dicoding × DBS — Front-End & Back-End Developer • Full Graduate
- BNSP / LSP Informatika — Analis Data Madya
- MTCNA — MikroTik Certified Network Associate
- Microsoft — Microsoft Certification

LANGUAGES

- Indonesian — Fluent (Spoken & Written)
- English — Intermediate
